

# Cubic unit cooler

Commercial and semi industrial 3C-A range

- The 3C-A range is designed for commercial and semi industrial refrigeration applications or low temperature storage.
- Numerous electric, hot water or hot gas defrost possibilities.
- Wide choice of options for specific environment (streamer, stainless steel, ...).
- EC motor (optional) enables optimization of noise level and power consumption.

Heatcraft reserves itself the right to make changes at any time without preliminary notice - Photos non-contractual

**Energy efficiency**  
Natural fluids:  
Glycol water  
*CO<sub>2</sub>* (R744)\*

\* Operating pressure 60 bar

1 35 kW

# 3C-A - Cubic commercial and semi industrial unit cooler

## Market segments

- Bars - Restaurants - Corner shops - Mini-markets
- Hard Discount - Supermarkets - Hypermarkets
- Refrigerated storage and transit stocking - Dispatch centres - Food processing

## Description

### Casing

- The aesthetic, white pre-painted galvanized sheet steel casing enables easy cleaning of the unit.
- Articulated drain pan with rounded corners to eliminate condensate retention zones and no sharp or cutting edges to guarantee total safety.
- Hinged intermediate drain pan to help limit condensation (3C-A .. E/C).

### Ventilation

- High efficiency motor fan factory wired.
- EC fans available as an option (electronic commutation).
- The 3C-A unit cooler range is equipped with axial fans, requiring no routine maintenance:
  - Ø 300 mm, 4P = 1,320 rpm, 230V/1/50-60Hz, mono-block, IP 44, class B, internal thermal overload protection.
  - Ø 450 mm, 4P = 1,500 rpm, 230-400V/3/50Hz, mono-block, IP 54, class F, independently thermal overload protections to be connected.
- The high-efficiency, profiled fan blades turn at a very low noise level.
- Fan guards are compliant with safety standards.
- The 2V5 option offers a low speed setting which is ideal for applications in which noise level is a key consideration.

### Coil

- The highly efficient and compact 3C-A range finned coils are designed with aluminium fins (fin spacing 4 or 6 mm) and internally grooved copper tubes.
- The coils are supplied via a Venturi distributor.
- Coils for using the same unit cooler in positive or negative application.
- Multi refrigerant (HFC) coil.
- CO<sub>2</sub> or water glycol as an option on the entire range.

### Defrost

- Depending on the condition in the cold room, different level of defrost capacity are available factory wired or delivered as kits (see table below).
- Shielded electric heating elements are inserted in the sleeved tubes in the finned coil.
- One of the heaters is fastened under the intermediate drain pan. This facility enables homogenous heat distribution for fast and efficient defrosting.
- 230V/1-phase, 230V/3-phase or 400V/3-phase connection possible.
- **3C-A .. E/C range:** standard, the heaters are factory wired to a terminal block in a sealed junction box and connected for 230V/1 and 400V/3.
- **3C-A .. R/L range:** optional heaters and wiring (E1U and E2U).
- The condensate is recovered in an intermediate drain pan and then drained via a large drain fitting (Ø 1" G).
- Hot gas or glycol water defrost in option.

## Designation

**3C-A<sub>(1)</sub> 3<sub>(2)</sub> 3<sub>(3)</sub> 54<sub>(4)</sub> -R<sub>(5)</sub>**

- (1) ADVANCED range
- (2) Fan diameter: 3 = Ø 300 mm - 4 = Ø 450 mm
- (3) Number of fans
- (4) Model
- (5) Fin spacing: R/E = 4 mm - L/C = 6 mm

## Certifications

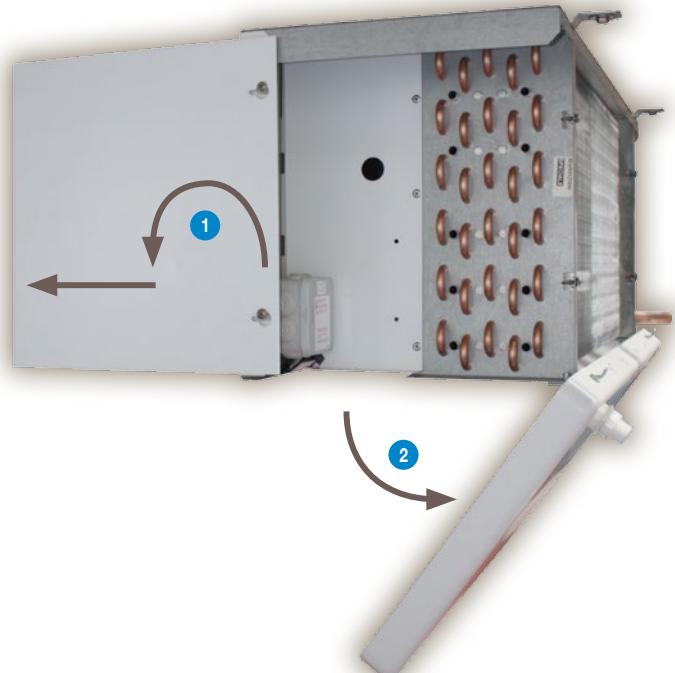

## Avantages

### Installation / Entretien / Maintenance

- Large space available for easy installation of the expansion valve.
- Large electrical enclosure rendering maintenance tasks easier.

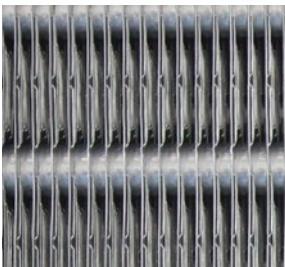

- ① Easy removable side panels and ② articulated drain pans (interior and exterior), offering fast and easy access to all unit cooler elements (coil, fans, defrost heaters, connections...).

		Number of heaters

# 3C-A - Cubic commercial and semi industrial unit cooler

## Application of options

### Homogenous distribution of air flow

#### RFA option - Air stream deflector (streamer)

Provides increased air throw, optimized air flow and efficient distribution of air in the cold room.

### Application requiring installation of a textile duct

#### VGT option - Textile duct shell

Shell used to fasten the textile duct (not supplied).

### Adapted ventilation and noise level

#### 2V5 option - Two-speed fan

The fan motor may be wired for high or low speed:

**High speed** during the charging phase requiring high capacity.

**Low speed** during a long storage period or in case of presence of employees for reduced noise level.

### Defrost for low-temperature applications

#### VPM option - Flexible defrost sleeve + shell + RFA

Avoid circulation of hot air during defrost cycles.

Reduction of defrost cycle time for energy saving.

Kit	Factory	Options
